

## TIMERS & SWITCHES

### Fireproof ceiling mount PIR timer

#### Description

This PIR Timer unit has been specifically designed to meet the growing need from building control to maintain fireproof qualities in ceilings in public buildings and new build extensions. Its intelligent pre-wired design is particularly useful for ceilings where access above is limited or difficult. This compact unit is one pre-wired for your convenience and has intumescent seals designed to comply with domestic and commercial fire requirements from building control.

The PIR is a time switch designed to sense moving infra red such as moving body heat, and activate a load or appliance for a specified time period. An internal light sensor in the switch will keep the load switched off when sufficient ambient light is available.

A red indicator LED signifies when timing has been retriggered and when the unit is in its final minute of countdown. Time control is adjustable from 2 minutes to 1 hour and the unit features a white allowing easy access to timing, lux and sensitivity control without the need for removing from the ceiling.

Part No.	Type	Configuration	Finish	Rating
374B-1FPC	Fireproof ceiling mount PIR timer	3 Wire	White	10A-240V

See Technical pages 48-56 for wiring diagrams.

#### Key features:

- 10A any load type (requires Capacitor PFCC-1 for all types of low wattage and LED loads)
- Sensitivity Adjustment control
- Auto Lux and Manual Lux for extra daylight saving control
- 10 second test mode to speed up installation time
- Time settings from 2 mins to 1 hour
- 360o Detection
- 6 - 7 m detection range
- Pre-wired in 3 core cable for your convenience
- Last minute indicator on illuminated
- 10A any load type (requires Capacitor)
